ANA-ASHUR Short Term Plan

Date: Nissan 6756 Assyrian Year 14 June, 2006

No individual can progress without a vision. No nation can progress without a common vision, a common objective or a common aspiration. There is no life as miserable and worthless, as living without a vision and purpose for living. Discovering success is defining our potentials, following a defined plan and action aimed at achieving our potentials, and believing in oneself. The moment we find our purpose in life, life becomes worth living, sweet and eventful. That is what success is all about: converting challenges and miseries (miss-story) to history (history). Having a vision means having a goal, purpose, an achievable objective, or an attainable aspiration. It may be individual or collective vision(s). As good as the visions of our founding fathers and current political leaders may seem, we of the view that it is not of any relevance to our modern age as the question now is what to do with the power that lies within each and every one of us, not struggling for what we all possess within us, but deceived to believe that we could only make a change through political parties/ appointments. Since it is not advisable nor in the national interest for every one to gun for political gains or power, we can achieve whatever we imagine in our mind, dominate, impart, positively affect, influence, occupy and constantly improve our individual and collective lives and sphere/area of contacts by tapping into the powers that lie within each and every one of us. This, if done, will inevitably translate into a progressive individuals and collective progressive persons determined and committed to remain one strong, successful, united, indivisible and indissoluble nation committed to upholding a common aspiration, vision, or objective for the supremacy and reign of values for the common good and welfare of the Assyrian nation and its posterity, under a visionary leadership and citizenship. Successful societies have been progressive by renewing their sense of national identity, their national purpose/ vision and the cultural values they have in common. This you can do by participating (directly or indirectly) in a national conference to be held with in 45 days from issuing this proposal, to all work as Assyrians for the Assyrian Cause and interests and above all live above selfish, partisan, personal and pecuniary interest. The Assyrian people have been put in between forces whose strategies, interests, goals and the methods which they use contradict in essence with the goals and interests of the society and nation. The main struggling factions within and outside the nation are very much aware and knowingly push the struggle in a very sharp and fast manner of a draw and attract operation in all domains, investing and using the present critical state of

affairs of the Assyrian people, and for that they are employing and will use all the possible tools including the immoral ones.

From this understanding and directives we call upon the collective of the Assyrian political entities -Assyrian national line- to be aware as to the gravity of what's happening to our Assyrian nation and the dangerous goals of those who want to break and procrastinate our nation. They should be aware of the dreadful results, the near and distant effects and to distance themselves in a quick manner with a complete awareness and realization, and let's make our rescuing program simple and clear. Our agenda is as the following:

1- Forming an Assyrian political front or block to save the nation and the national project creating an internal gathering with a defined base made of the entire Assyrian political entities- The Assyrian national line.

2- Our central and direct mission is: A one and unified Assyrian political national speech.

3- The Assyrian political representation for the Assyrian decision in Iraq, with the regional countries and the international assemblies as follows:

Forming an Assyrian high political and reference committee to directly negotiate with the central Iraqi government in the name of the Assyrian nation in the world without any restrictions, conditions or pressures whatsoever.

A- The Assyrian nation which constitute more than (4) four million people has the right to have (20) twenty parliamentary seats to represent all the sons/daughters of the Assyrian nation in Iraq and around the world, on the basis that the Assyrians are the indigenous people of Iraq no matter where they were born or where they live, even if they're not inhabiting Iraq at present because the Assyrian is an Iraqi who is not inhabiting Iraq today because of the inflictions and calamities which befell the sons and daughters of the Assyrian nation in the past (100) one hundred years.

B- The fate of the Assyrian lands. Finding methods for an Assyrian region or creating an Assyrian governorate based upon the constitution which was derived and drafted from the interim administrative law of the Iraqi state, specifically article IV which legislates the following:

*** The system in Iraq is a federal, republican, democratic, pluralist with the powers being shared between the federal and regional governments, the governorates, municipalities and local administrations. The federal system is based on geographical and historic facts, the separation of powers and not on the basis of roots, race, ethnicity, nationality or sect.

*** Based upon this article of the interim Iraqi state administrative law that "Federalism principals and the foundation of the Iraq permanent constitution was based on", we can legally prove the geography of the land of Ashur and its Assyrian history.

In the event that the Iraqi government doesn't respond, if there are restrictions or if there's an inability to realize the above, then the high committee of the Assyrian front shall arrange the methods, tools and preparations to form an Assyrian government and an independent Assyrian parliament in exile, declaring that the historical and geographical land of Ashur is under occupation, registering the Assyrian Cause at the international court as per the international laws and the peoples rights as well as registering the Assyrian Cause internationally through the United Nations and the great powers.

4- Renewing and re-vitalizing the Assyrian national and educational thought

As we chart a new course for our common aspirations, vision or purpose we should among other issues discuss/consider the following:

- (1) Our plans of action in the event of an open wide Iraqi civil war.
- (2) The fate of our people who are refugees in Syria, Turkey, Jordan and Greece.
- (3) Building the legal case against Turkey in the matter of the Assyrian genocide during the years of 1914 – 1919, to be presented to the international court in the Haig.
- (4) Our plans of action for our people in the event of an American invasion to Syria or Iran
- (5) What is the guarantee that we stand to fare better as a separate unit/ entity and that the same reasons that falsely intend to cause us to split will not haunt us or increase after taking that uncivilized and insincere approach to solving our common challenges? Will the same persons that failed us but are now calling for disintegration due to selfish reasons/ interest and agenda not take us back to where we thought we were running away from?
- (6) A new, definable, attainable, improvable, communicable and transmittable common vision(s), aspiration(s), or objective(s) for the present and future of the Assyrian nation that we can all be proud of to generations yet unborn.
- (7) The need for fast, easy and affordable access to information and information technology. Information rules the world and it is the only durable storage medium and unit for measuring wealth, success and development.
Anything less than a holistic approach to our problems/challenges will only be scratching and postponing inevitable hard choices that confront us, while delaying our steady march towards national integration.
